

Atrisco Roadway Improvements Public Meeting

Bernalillo County Public Works Division is planning for construction on Atrisco Road, SW between Bridge Boulevard, SW and Five Points Road, SW in June, 2006. A public meeting to discuss the construction process and answer any questions is scheduled for May 31. As discussed in prior public meetings and newsletters, the purpose of this project is to improve pedestrian facilities and to relieve storm water ponding within this segment of roadway. All residents and business owners within the project area are invited to attend the public information meeting prior to construction. The first two public meetings were held on October 24, 2005 and January 23, 2006. **The next public meeting will be held at 5:30pm on Wednesday, May 31, 2006, at the Holy Family Church. The address is 550 Atrisco Road, SW.**

The new roadway improvements include construction of curb and five-foot wide sidewalk along the east side of Atrisco Road between Bridge Boulevard and Five Points Road and the addition of curb and sidewalk along the west side of the roadway between Hooper Road and Eucariz Road. Once the project is completed, pedestrians will have sidewalk access on both sides of Atrisco Road for the entire roadway stretch, tying into existing improvements as well as proposed improvements from other projects. Additionally, a 24-inch diameter storm drain will be constructed under Atrisco Road between Eucariz Avenue and the Isleta Drain to discharge stormwater runoff to the Isleta Drain. Concrete driveways are proposed to provide access to the residences along Atrisco Road. Residents' concerns regarding safety and access have been addressed on the design plan set. The new roadway facilities will provide much safer travel along Atrisco Road for both pedestrians and vehicular traffic.

The estimated cost for these roadway improvements is close to \$1 million dollars. Funding is provided by Bernalillo County and state legislative appropriations.
